

AXA-VC42

4 in x 2 out Composite Video Switcher.

The AXA-VC42 enables devices on a Dynalite network to control the selection between 4 separate composite video inputs to two independent composite video outputs.

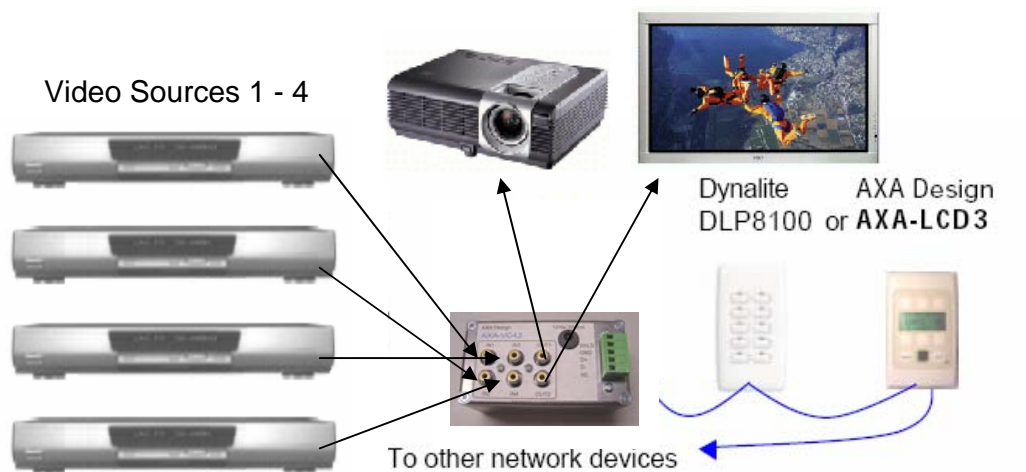

AXA-VC42

The input selection is controlled by sending Dynet 'preset' messages via the RS485 connections. An area number is assigned to each output and preset 1, 2, 3 or 4 selects input 1, 2, 3 or 4 respectively for each area. 12V AC plug pack supplied.

TYPICAL APPLICATION

Video distribution to 2 devices controlled via the Dynalite network
